Sporting Interests: Travel and fishing.

Jean McIntosh (*Non - Board member*) From her former roles as an executive secretary for United Realty, Pilkington Glass and NZ Shipping Corporation, Jean provides administrative support to the Rebus Board together with editing and proof-reading of Rebus Newsletters. She is also the Editor of the Club News section of the Rebus Chronicles publication and can claim the credit for coming up with the Rebus name during a brainstorming session in September 2015.

As a Treasurer over several years for the Hibiscus Coast Floral Art Group, she is very familiar with the same accounting software used by Rebus. This could enable back-up support for the Rebus Treasurer should that ever be necessary.

John McColl – *Non Board Member and Foundation Member of Rebus NZ Inc.*

John, as a member of the former Probus Club of Hibiscus Coast, adapted the sophisticated software he had designed for the Club's own membership records, to provide a database for use by the original Steering Committee. This enabled the Committee to maintain quality communication with the 273 Clubs who disaffiliated from Probus South Pacific Ltd. The system was further extended for use by Probus NZ Inc.

With the establishment of Rebus NZ Incorporated, John has again used his programming skills to replicate this facility for the benefit of all Rebus affiliated clubs.

Paul Wilkinson – *Non Board Member.* Paul, is also a member of the Rebus Club of Hibiscus Coast. Among his many talents is website design and maintenance. Rebus NZ Inc's website which was originally designed by John McColl, is now kept up to date on a regular basis by Paul so that affiliated clubs have ready access to all the features to be found at www.rebus.nz.

The Rebus Board believe that for a website to have relevance and a reason to return, visitors need to see that it is constantly receiving the latest news and updates, rather than being in a state of neglect as can so often be the case. The Board expresses its appreciation to Paul for his enthusiasm in maintaining such a high standard.
